

SPAZIO File Extender

Advanced file brokering for WebSphere Message Broker

Business problem

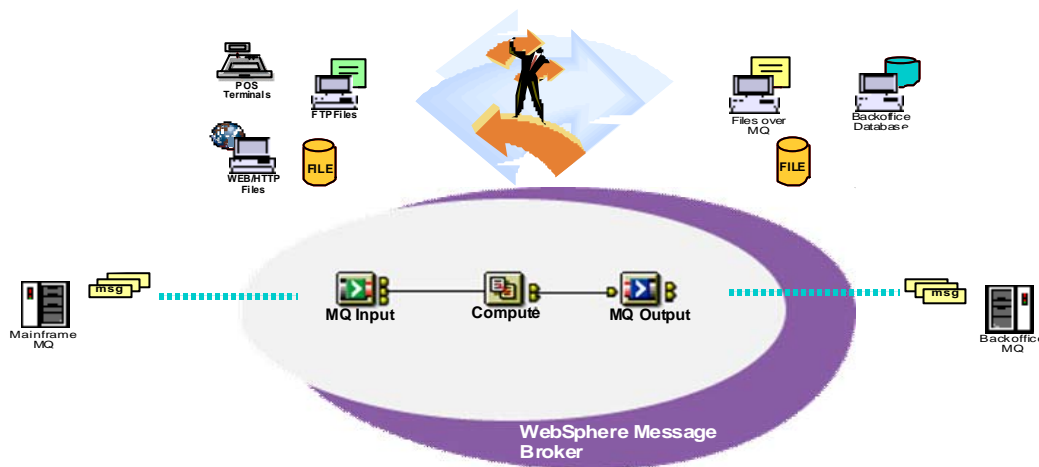

IBM's WebSphere Message Broker provides connectivity for disparate applications, linking them together to form a unified business service.

With data enrichment, transformation, database connectivity and a host of other functions built-in, providing seamless business services to your customers has never been so easy.

So what's the problem? Files and batch based applications; every company has them and these seem to have been left out of the equation.

You've invested in WebSphere for your real-time applications but the file-based ones don't fit in. More often than not they're left out, unable to take advantage of your WebSphere investments.

Until now!

Solution description

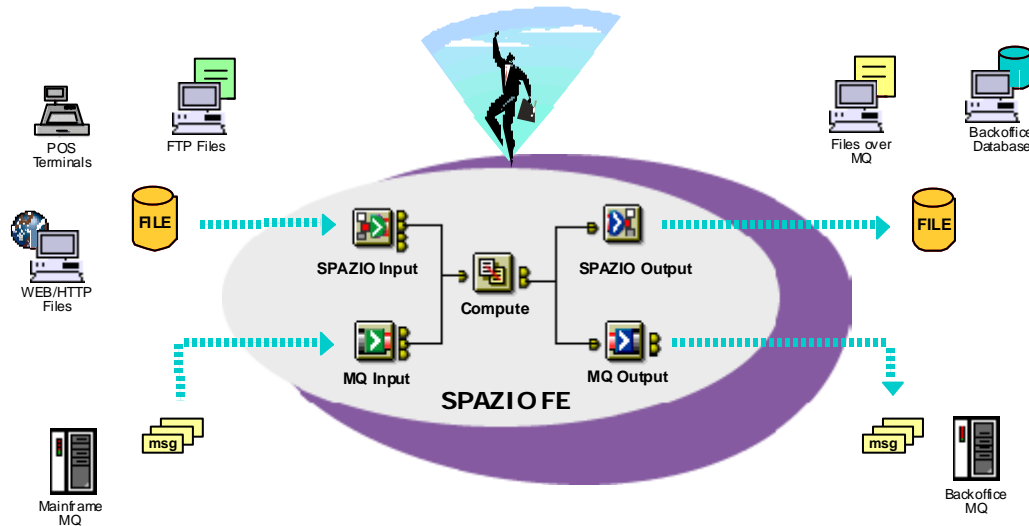

Drawing on Primeur's years of experience with advanced data transfer systems SPAZIO File Extender provides plug-in nodes for IBM's WebSphere Message Broker. Coupled with advanced file transfer and management systems, SPAZIO File Extender enhances WebSphere Message Broker beyond pure messaging into a complete brokering solution for all your services and applications.

SPAZIO File Extender extends IBM's WebSphere Message Broker to provide advanced file routing, content enrichment and transformation. Used with Primeur's MFT/S suite, WebSphere Message Broker can also be extended to provide file connectivity through the standard protocols: HTTP(S), FTP(S), SFTP, SMTP, S/MIME, PGP over the WebSphere MQ network, and exchange files with proprietary File Transfers such as CONNECT:Direct, CA-XCOM, XFB-Axway, NetView FTP, NetMaster, etc.

Benefits at a Glance	
<p align="center">Business opportunity</p> <ul style="list-style-type: none"> ■ Improvement in time-to-market: fast deployment of the solution ■ Reduction in expense, downtime and maintenance ■ Leveraging on investment of software and existing WebSphere know how ■ Integration of business applications at the procedural and program level: this is a first step towards SOA on demand Business ■ Reduction in the total cost of the operating environment (TCO). SPAZIO FE return on investment (ROI) is rapid and demonstrable ■ Full EAI capabilities to your file transfer based applications without the huge investments needed to rewrite, modify or change the applications ■ Use of WebSphere Business Integration Brokers as single enterprise-wide broker technology, for message oriented brokering and File oriented brokering ■ Timely 7/24 support 	<p align="center">Management</p> <ul style="list-style-type: none"> ■ Single point of control and management for all brokering functions ■ Mix and match file and message information sources in a seamless fashion ■ Aggregation of messages into files, according to rules specified in message flow ■ Splitting of files into messages; file records may be converted to messages or enhanced and incorporated into new files
	<p align="center">Auditing & Security</p> <ul style="list-style-type: none"> ■ Extensive audit trail of transfers instrumental in achieving compliance with Sarbanes-Oxley Act and ISO 17799 Recommendation ■ File and message channels may be secured using industry standard methods

SPAZIO File Extender extends WebSphere Message Broker enabling file and message based delivery channels. Branch POS terminals could send updated records at batched intervals via file rather than overnight, suppliers could provide Internet EDI for orders, invoicing and supply chain management. Global companies could link offices worldwide via a single broker architecture.

With SPAZIO FE, now you have a global brokering solution for all your services and applications.

SPAZIO FE is available for the following platforms :

- WebSphere Message Broker 6
- WebSphere Business Integration Message Broker 5

Problems of in-house development

Some users have developed "ad hoc" software only to discover after a while that is not adequate any more due to continuous changes in the environment (corporate mergers, changes in the law, technological progress). The integration achieved with great difficulty between heterogeneous archives, programs and operating platforms is often made obsolete by new components which were not foreseen at the start.

Who we are

Primeur is an Italian multinational company founded in Genova in 1988. We are now present in Europe, the US and South America as one of the leading vendors of middleware solutions for distributed and heterogeneous IT systems. Primeur has been focussing for years on the IBM WebSphere, Tivoli and Linux environments, becoming an IBM Premier Business Partner.

Our mission is to partner with our Customers in their journey towards successful implementation of SOA Technology and its business benefits, building SOA based technology components and privileging products that complement IBM's SOA reference architecture.

Primeur's flagship product, Spazio, has been constantly improved along the time to include the latest technologies and standards. Our solutions are available on the main hardware and software platforms such as: z/OS, AIX, UNIX, Windows, OS/400, Linux and z/Linux, VMS, Tandem.

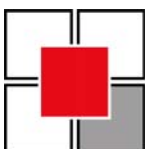

Primeur offers solutions in three areas of prime importance:

- Integration,
- Security
- System Management

Through a combination of products, services and qualified experience, Primeur solutions can also be tailored to meet the specific customer requirements

Primeur complies to a Quality Management System for Planning and Development of Software Products and Professional Service projects according to UNI EN ISO 9001:2000, certified by TÜV.
