

# SPAZIO Managed File Transfer/Secure (MFT/S™)

*Centralized control and Secure File Transfer using Internet protocols, WebSphere MQ technology, the most widespread OEM transports and Home-made (RYO) File Transfers*

## Business Problem

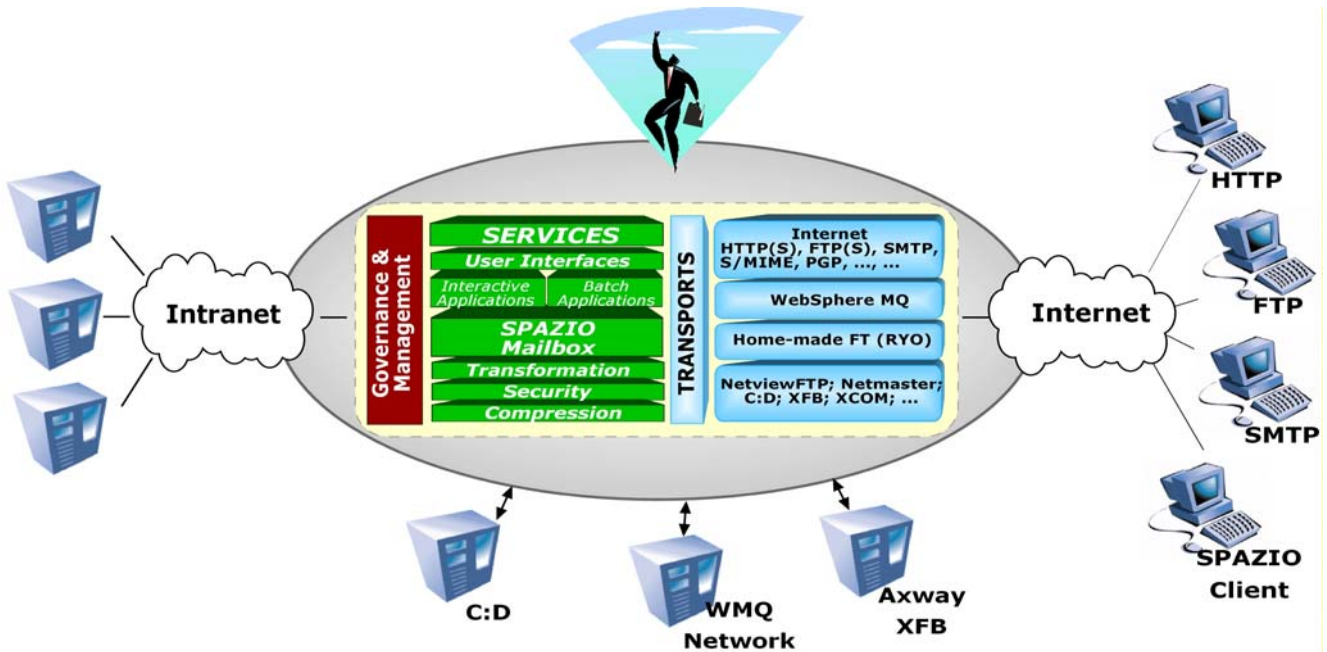

In the e-Business environment, companies need to use electronic facilities to move information to customers, suppliers, business partners or employees, in a reliable, secure and efficient manner. Effective tools for the exchange of data have become essential in allowing the enterprise to reach new markets and build long lasting commercial relationships. In many cases these exchanges involve critical data such as bank transfers or confidential information; its loss or tampering can have an extremely negative impact from the financial, legal and image points of view.

## Solution Description

PRIMEUR has built a **modular** product that provides powerful managed and secure file transfer solutions to the broadest range of multi-platform and multi-protocol scenarios. SPAZIO MFT/S is a comprehensive solution set designed and built to meet all your file transfer requirements, based on a de-coupled, store and forward, mailbox architecture. Files to be transmitted are stored in the mailbox on the sending system and then, at some later time or immediately depending on the configuration and availability of the target system, forwarded to a mailbox on the destination system. Users need not concern themselves with establishing connections, synchronization and recovery processes in case of failure when different applications need to exchange data in a networked environment. Applications simply move data into the local mailbox.

Benefits at a Glance	
<p style="text-align: center;"><b>Business Opportunity</b></p> <ul style="list-style-type: none"> <li>■ Optimized exchange of <b>business information</b> based on <b>files</b></li> <li>■ Help <b>reduce operational costs</b></li> <li>■ Reduce costs by <b>leveraging existing IT investments</b> (Manage more with less and no application change)</li> <li>■ Deliver rapid solutions for exchanging business information by file based integration</li> <li>■ High volume file transfer with assured delivery support</li> <li>■ Multiple protocol and multiple platform support</li> <li>■ Open to the Internet in a <b>controlled and managed way</b></li> </ul>	<p style="text-align: center;"><b>Management</b></p> <ul style="list-style-type: none"> <li>■ <b>Guaranteed delivery</b> and LOG Management.</li> <li>■ <b>Lifecycle Data Flow Governance</b> with Orchestration Suite Monitor/Modeler/Agents.</li> <li>■ <b>SNMP and Tivoli Network Management.</b></li> <li>■ Basic data feed to <b>SLA.</b></li> <li>■ <b>Centralized Configuration.</b></li> <li>■ <b>Planning and scheduling for data traffic.</b></li> <li>■ <b>Automatic Arrival Files Versioning.</b></li> <li>■ <b>24-hour Call Center</b></li> </ul>
<p style="text-align: center;"><b>Return on Investment</b></p> <ul style="list-style-type: none"> <li>■ <b>Time-to-market:</b> fast deployment: rapid and demonstrable ROI.</li> <li>■ <b>Reduction in expense,</b> downtime and maintenance associated with RYO solutions.</li> <li>■ <b>Reduction in the costs</b> of existing transmission networks and TCO.</li> <li>■ <b>Protection of investments</b> over time: add-on modules implemented rapidly</li> <li>■ <b>Scalable up to Mainframe level,</b> also available in Cluster Environment.</li> </ul>	<p style="text-align: center;"><b>Competitive Advantage</b></p> <ul style="list-style-type: none"> <li>■ <b>Integration</b> of business applications at the procedural/and program level.</li> <li>■ <b>Interface-ability with z/OS.</b></li> <li>■ <b>Interoperability:</b> multiplatform and multi protocol operating environment.</li> <li>■ Gateway between <b>WebSphere MQ</b> networks and the Internet</li> <li>■ <b>Third party FT Connectivity and Management</b> (WMQ, FTP, Connect:Direct, XCOM, XFB, etc).</li> <li>■ integration with <b>SWIFTNet</b></li> <li>■ <b>Transfer Audit Trail:</b> compliance with SOX, Basel II, ISO 17799.</li> <li>■ <b>E2E Data Encryption</b> and Partner Authentication w/PKI and PKCS.</li> </ul>
<p><i><b>Integrate Managed and Secure Data Movement in your environment</b></i></p>	

# With SPAZIO MFT/S, now you are in full control of your Secure Data Transfer

## SPAZIO is available for the following platforms (also in cluster environments):

- z/OS
- Various flavours of Unix (AIX, SUN, HP, etc.)
- Non-Stop Tandem
- VMS
- OS/400
- Linux

## Problem of in-house development (RYO)

Some users have developed "Roll Your Own" file transfer software only to discover after a while that it is not adequate any more due to continuous changes in the environment (corporate mergers, changes in the law, technological progress). The integration achieved with great difficulty between heterogeneous archives, programs and operating platforms is often made obsolete by new components which were not foreseen at the start.

## Who we are

Primeur is an Italian multinational company founded in Genova in 1988. We are now present in Europe, the US and South America as one of the leading vendors of middleware solutions for distributed and heterogeneous IT systems. Primeur has been focussing for years on the IBM WebSphere, Tivoli and Linux environments, becoming an IBM Premier Business Partner.

Our mission is to partner with our Customers in their journey towards successful implementation of SOA Technology and its business benefits, building SOA based technology components and privileging products that complement IBM's SOA reference architecture.

Primeur's flagship product, Spazio, has been constantly improved along the time to include the latest technologies and standards. Our solutions are available on the main hardware and software platforms such as: z/OS, AIX, UNIX, Windows, OS/400, Linux and z/Linux, VMS, Tandem.

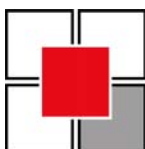

Primeur offers solutions in three areas of prime importance:

- Integration,
- Security
- System Management

Through a combination of products, services and qualified experience, Primeur solutions can also be tailored to meet the specific customer requirements.

Primeur complies to a Quality Management System for Planning and Development of Software Products and Professional Service projects according to UNI EN ISO 9001:2000, certified by TÜV.
