Solution Overview

SAMPLE JOURNEY TOWARDS GDPR COMPLIANCE

Step 1

The GDPR Catalog:
from scattered Word & Excel
docs to a GDPR ready solution

Result

All GDPR-related entities are
linked one another in the GDPR Catalog
browsable through interactive maps

Step 2

Records of Processing Activities
& Processors' Chain
management

Result

The perimeter of applications,
databases and systems **to be secured**
is defined

AREA UNDER SURVEILLANCE

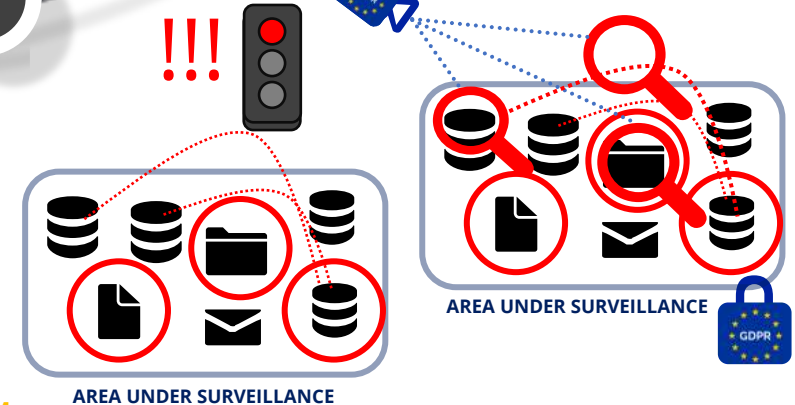

Step 3

Discovery of structured
and unstructured data

Result

Awareness of where Personal Data
is located in databases and files

Step 4

Data breach
management and
anomaly detection
in Data Flows

Result

Easy identification of
entities involved in
Data Breaches and
Data Flows are under
surveillance

WHAT IS DIFFERENT ABOUT PRIMEUR GDPR SOLUTION? (1/2)

Using a **Bottom-Up approach**, it acts as an **operational tool** to assist DPOs in their day-to-day Data Protection duties, going beyond GDPR scope.

Multiple views combining **menus** and **maps**, together with a **mobile** version to help you quickly get the information you need in the most convenient way.

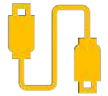

Extremely **versatile**, easily matching your complex organizational structure and your specific requirements, for an intuitive use of the solution.

WHAT IS DIFFERENT ABOUT PRIMEUR GDPR SOLUTION? (2/2)

Embeds a powerful **Data Discovery** module helping you better govern your data and quickly locate the Personal Data you are looking for, in structured and unstructured sources.

Completely open platform that connects to your existing IT systems and third-party tools.

Modular platform that you implement incrementally as your GDPR maturity grows.

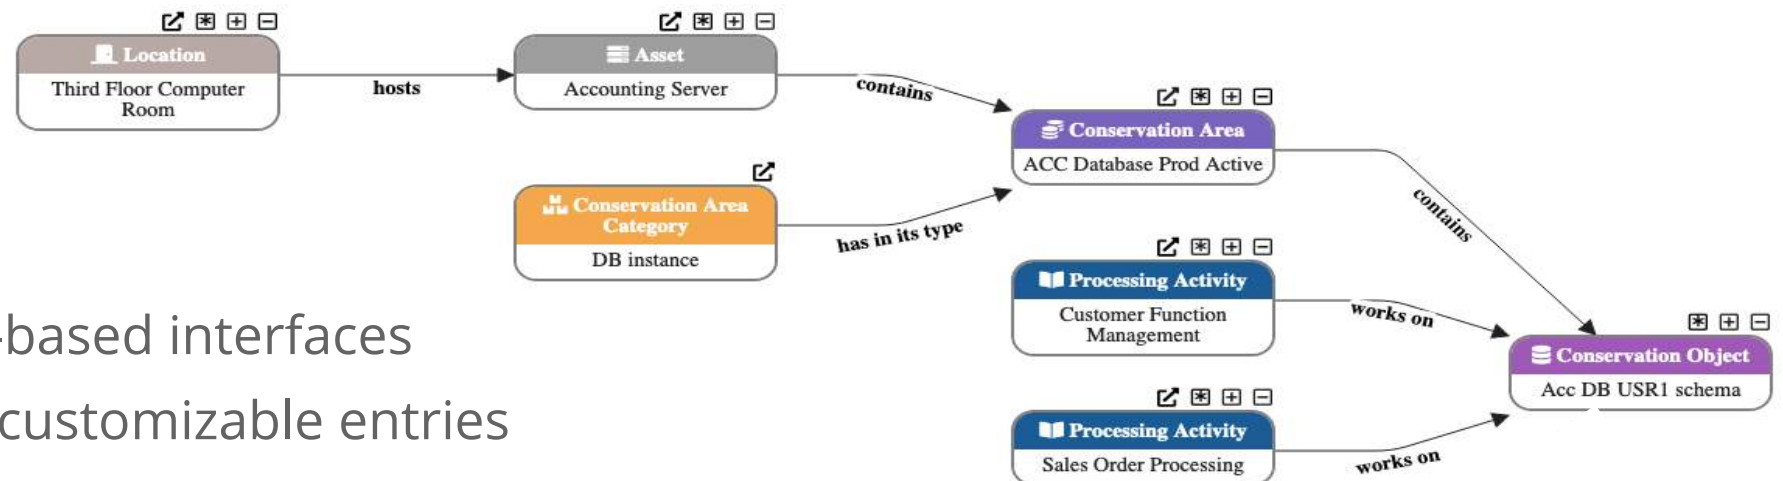

Based on a **simple and proven architecture**, it is easy to install, instantiate, manage and **scale** with cluster technologies, while managing **Big Data** environments.

MULTIPLE AND COMPLIMENTARY VIEWS

Interactive Data Maps

- Profile-based maps starting on day 0, automatically generated using both user-entered input and discovered data.
- Where needed, granular maps with all relationships between entities.
- Easy map customization to match requirements with the ability to save custom map views.
- At-a-glance view of risk points.

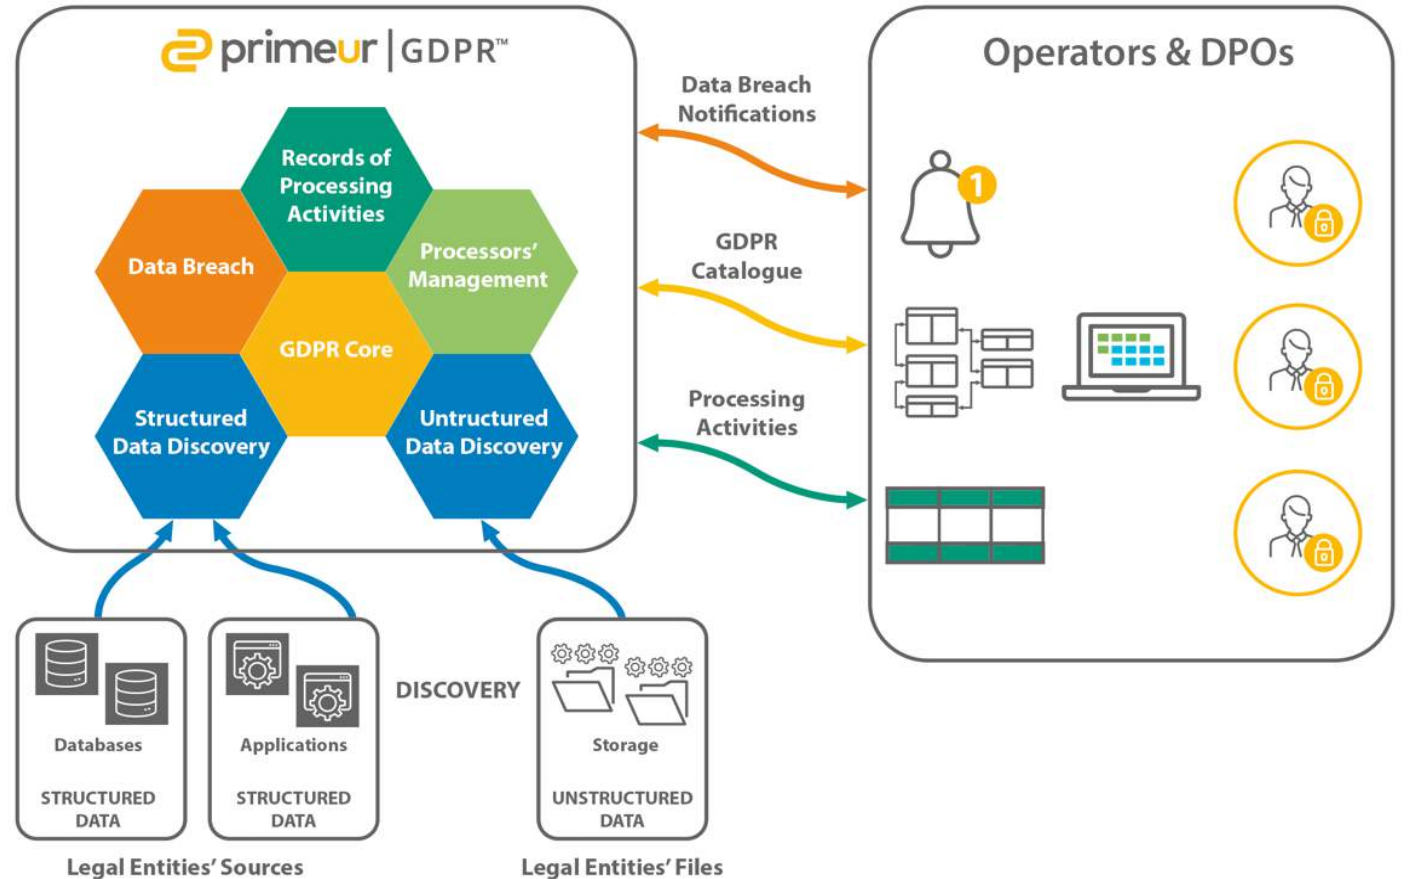

Menus

- Profile-based interfaces
- Highly customizable entries
- Multiple facilities to accelerate data collection
